[HackerRank](#) | [LINKEDIN](#) | [Github](#)

EDUCATION:

Masters in DataScience | SVU | Tirupati | 2023– 2025 | SCGPA – 75%

BSC MSCS | Gayathri college | Tirupati | 2021– 2023 | CGPA – 75%

SKILLS :

Programming Languages: Sql, Python, Machine Learning

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, FastAPI, Docker

Visualization Tools: Excel, Power BI, Tableau

Professional Skills: Communication, Teamwork, Problem Solving, Adaptability, Time Management

Languages: English, Hindi, Telugu

WORK EXPERIENCE INTERNSHIPS

1 “Exafluence Pvt. Ltd. – Remote/Tirupati”

(June 2025 – Nov 2025)

Developed a Shipment Management System (SCMLite) using Python (FastAPI), MongoDB, and HTML/CSS. Implemented real-time data streaming using Apache Kafka and Zookeeper. Used Docker for containerization and deployed services on AWS EC2. Contributed to ETL Chatbot development using LangChain and GPT-based LLMs to analyze ETL logs, errors, and job failures. Collaborated with senior engineers and data scientists on log parsing, pipeline diagnostics, and automated resolution suggestions.

2 “Salesforce Developer Intern-Salesforce”

(May 2023-Sep 2023)

Worked on Salesforce CRM modules including Sales Cloud and Service Cloud. Customized Lightning components, created workflows, validation rules, and triggers. Implementing automation by using Process Builder and Flow. Designed responsive UI with Lightning App Builder and Lightning Components.

PROJECTS :

“Shipment Management System (SCMLite)” - | [Github](#)

Built a full-stack Supply Chain Management system with FastAPI and MongoDB for shipment tracking and secure user access during my internship at Exafluence. Developed REST APIs and an HTML/CSS UI, implemented JWT-based role access, containerized with Docker, deployed on AWS EC2, and integrated Apache Kafka and Apache ZooKeeper for real-time streaming and coordination.

“Conversational Assistance for ETL Querying and Debugging”

Designed a GenAI assistant that analyzes ETL workflow and error logs stored in PostgreSQL to diagnose pipeline failures through natural language queries. Integrated LLM workflows to interpret errors, correlate them with workflow steps, and identify root causes. The system provides automated fix suggestions and actionable recommendations to speed up troubleshooting for data engineers.

“AI Based model Electricity demand projection including peak demand projection for Delhi Power System”

Developed a time series forecasting models to analyze and predict Delhi power Supply Demand pattern, addressing the Duck Curve effect caused by fluctuating solar energy generation and peak evening consumption. Utilized ARIMA, LSTM and Facebook prophet models in python, with pandas, scikit-learn, TensorFlow and matplotlib for data preprocessing, modelling and visualization.

“SMART NOTES APPLICATION”

Created a secure Notes Management application with FastAPI and MongoDB supporting full CRUD operations and user authentication. Designed REST APIs and a clean HTML/CSS frontend for easy note management. Dockerized the application and deployed it on AWS EC2 to ensure portability and reliable performance. Focused on modular backend structure and efficient database handling.

“Customer Segmentation Analysis using Clustering ”

Performed customer segmentation on 10,000+ records using clustering algorithms to identify distinct behavioral groups. Applied data cleaning, normalization, and feature selection for improved clustering performance. Determined optimal clusters using Elbow Method and Silhouette Score. Generated visual insights that supported targeted marketing strategies and increased engagement by 30%.

“Covid-19 Global Impact Visualization Dashboard”

Built an interactive dashboard using Python and Tableau to analyze global COVID-19 data from WHO and public APIs. Developed heatmaps, time-series charts, and comparative visuals for region-wise analysis. Enabled dynamic filtering and trend exploration to support data-driven insights and reporting.

CERTIFICATIONS & ACHIEVEMENTS

Salesforce Certified Developer

MongoDB Certified

Certified in Introduction to Data Science and Modern AI by Cisco Academy

Certification in GitHub from Simplilearn and SkillUp

Deloitte Data Analytics Job Simulation (Forage)

Presented paper on AI-Enabled Ethical Consumerism at Reva University Conference 2025

participated in Smart India Hackathon problem on Delhi power Fluctuation selected for state level.

Attended ISRO Workshop on AI/ML for Agricultural Forecasting.
