“MS in Data Science graduate with strong expertise in data analysis, Python, SQL, statistical analysis, data visualization, and machine learning models. Proven ability to clean, analyze, and interpret large datasets, build analytical models, and deliver actionable insights to support data-driven decision-making”.

EDUCATION

- **Masters in DataScience| SVU|Tirupati | 2023– 2025 | SCGPA – 75%**
- **BSC MSCS |Gayathri college|Tirupati | 2021– 2023 | CGPA – 75%**

SKILLS

- Programming Languages: SQL, HTML/CSS
- Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, FastAPI,Docker
- Visualization Tools: Excel, Power BI, Tableau
- Cloud Platforms: AWS (EC2, S3)
- Professional Skills: Communication, Teamwork, Problem Solving, Adaptability, Time Management
- Languages: English, Hindi, Telugu

WORK EXPERIENCE

INTERNSHIPS

1 Exafluence Pvt. Ltd. – Remote/Tirupati (June 2025 – Nov2025)

- Developed a Shipment Management System (SCMLite) using Python (FastAPI), MongoDB, and HTML/CSS
- Implemented real-time data streaming using Apache Kafka and Zookeeper
- Used Docker for containerization and deployed services on AWS EC2
- Contributed to ETL Chatbot development using LangChain and GPT-based LLMs to analyze ETL logs, errors, and job failures
- Collaborated with senior engineers and data scientists on log parsing, pipeline diagnostics, and automated resolution suggestions

2 Salesforce Developer Intern-Salesforce (May 2023-Sep2023)

- Worked on Salesforce CRM modules including Sales Cloud and Service Cloud.
- Customized Lightning components, created workflows, validation rules, and triggers.Implementing automation by using Process Builder and Flow.

Designed responsive U I with Lightning App Builder and Lightning Components.

PROJECTS :

“Shipment Management System (SCMLite)” - | [Github](#)

Developed a full-stack supply chain management system at Exafluence Pvt. Ltd.

Backend: Python (FastAPI) | Database: MongoDB | Frontend: HTML/CSS

- Used Docker for containerization; deployed services on AWS EC2
- Integrated Apache Kafka and Zookeeper for real-time data streaming and distributed coordination

“Conversational Assistance for ETL Querying and Debugging”

Building a GenAI-powered chatbot to debug ETL pipeline failures using natural language queries.

- Technologies: LangChain, GPT-based LLMs, Python, FastAPI
- Ingests and parses ETL logs from Airflow/NiFi to provide failure analysis and suggested resolutions
- Includes a web UI for interactive chat, job status summaries, and root cause insights

“AI Based model Electricity demand projection including peak demand projection for Delhi Power System”

- Designed forecasting models to project electricity demand and peak loads in Delhi.
- Models used: ARIMA, LSTM, Facebook Prophet .Addressed Duck Curve impact caused by solar energy fluctuations .Performed data cleaning, feature engineering, model tuning, and result visualization using Python.

“ Customer Segmentation Analysis ”

- Segmented 10,000+ customers into distinct behavioral groups using clustering techniques.
- Cleaned and normalized customer data; selected optimal features for clustering
- Used Elbow Method and Silhouette Score to determine cluster count
- Delivered visual insights via Matplotlib and Seaborn
- Outcome: Enabled targeted marketing, resulting in 30% increase in engagement.

“ Covid-19 Global Impact Visualization Dashboard”

Built an interactive dashboard to analyze and visualize real-time global COVID-19 data. Data sourced from WHO and public APIs .

- Created dynamic visualizations (heatmaps, time-series, bar charts) using Python and Tableau
 - Enabled region-wise comparisons and trend analysis through filterable views
 - Supported data-driven decision-making with up-to-date visual insights.
-

CERTIFICATIONS & ACHIEVEMENTS

- Salesforce Certified Developer
 - MongoDB Certified
 - Oracle University certified as Data Science Professional
 - Deloitte Data Analytics Job Simulation (Forage)
 - Presented paper on AI-Enabled Ethical Consumerism at Reva University Conference 2025
 - participated in Smart India Hackathon problem on Delhi power Fluctuation selected for state level.
 - Attended ISRO Workshop on AI/ML for Agricultural Forecasting
-

PUBLICATION : [To view the research paper](#)

- Paper Presentation on Reva University National Conference 2025 in Bangalore - paper on AI -Enabled Ethical Consumerism in modern Brand Strategies. Asian Journal of Management and Commerce. E-ISSN:2708-4523, P-ISSN: 2708-4515
 - Conversational Assistance for ETL Query and Debugging Scope International Journal of science, Humanities, Management and Technology (SIJSHMT)-ISSN :2455-068X .
